Summary

MCA graduate and aspiring Full Stack Developer with project-based experience building responsive web applications and REST APIs using React.js, Node.js, Express.js, and MongoDB. Strong foundation in JavaScript, TypeScript, Python, SQL, and modern web development practices. Experienced in developing and deploying responsive interfaces using React, Tailwind CSS, and Vercel.

INTERNSHIPS

Tata **Data Visualisation: Empowering Business with Effective Insights**

Completed practical tasks focused on framing business problems, selecting appropriate data visualizations, creating effective visual representations, and communicating data-driven insights. Applied data analysis and visualization concepts to interpret business information and support informed decision-making.

Data Analysis, Data Visualization, Data Interpretation, Dashboard Development, Data Presentation

Goldman Sachs **Operations**

Completed practical tasks exploring Wealth Management Operations, transaction facilitation, client service, and operational processes. Developed an understanding of transaction management, process improvement, risk awareness, and operational efficiency through realistic business scenarios.

Operations, Wealth Management, Transaction Management, Process Improvement, Risk Management

Project

Digital PA [Live Link] **React, Tailwind CSS, Framer Motion, GSAP**

Developed and deployed a modern, responsive portfolio website for a creative agency using React and Tailwind CSS. Integrated smooth scroll animations with GSAP and Lenis Scroll, and implemented engaging UI transitions with Framer Motion. Deployed the site using Vercel for seamless hosting and performance optimization.

Landing Page [Live Link] **React, Lenis, Canvas API, Vercel Analytics**

Developed a responsive landing page with parallax scrolling, interactive canvas animations, and smooth scroll, WhatsApp lead generation, and mobile-optimised
